

AFRIVATE STANDARD WORK PROCESS (SWP)

Document Status	Official Internal Policy
Applies To	All AfriVate Employees, Contractors, Volunteers & Team Leads
Effective Date	4 February 2026
Review Cycle	Every 6 Months
Approved By	CEO & Executive Leadership

1. PURPOSE OF THIS DOCUMENT

The AfriVate Standard Work Process (SWP) is the authoritative framework governing how work is performed, managed, recorded, and evaluated across the organisation. It formalises operations, establishes accountability, and sets clear expectations for professional conduct, performance, and collaboration across all teams.

This document is designed to:

- **Eliminate ambiguity** by clearly defining roles, responsibilities, authority, and expectations.
- **Standardise operations** so work is executed consistently across teams.
- **Enable accountability** through measurable standards, accurate Portal records, and appropriate consequences.
- **Support scalability** through systems suitable for growth, hiring, delivery, and infrastructure expansion.

Mandatory compliance: This SWP is the primary operational standard for AfriVate personnel. Failure to comply may result in corrective or disciplinary action.

2. CORE PRINCIPLES

- **Accountability:** Every role has defined ownership, deliverables, and measurable outcomes. Team members own the quality, timeliness, impact, and accurate reporting of their work.
- **Structure with Flexibility:** AfriVate maintains clear systems for order and predictability while permitting justified flexibility that does not weaken accountability.
- **Professionalism:** All personnel must demonstrate reliability, ethical conduct, time discipline, and respect. Informality must never become laxity or missed obligations.

- **Transparency:** Expectations, decisions, evaluations, and consequences must be clearly documented and communicated through the approved systems.
- **Performance-Driven Growth:** Advancement and opportunities are earned through consistent results and professional behaviour.
- **Excellence:** Work must be thoughtful, precise, impactful, and continuously improved—not merely completed.

3. ORGANISATIONAL STRUCTURE & AUTHORITY

3.1 Leadership Hierarchy

- **Chief Executive Officer (CEO):** Strategic direction, final decision-making authority, and organisational accountability.
- **Executive Leadership / C-Level:** Departmental oversight, strategy execution, and cross-functional alignment.
- **Team Leads:** Day-to-day operational management, task assignment, performance monitoring, review, and escalation.
- **Team Members:** Execution of assigned responsibilities and delivery of defined outcomes.

Leadership roles exist to manage responsibility, performance, and escalation. They do not imply personal superiority.

3.2 Reporting Lines

- Team Members report to their assigned Team Lead or formally designated manager.
- Team Leads report to their Department Head or the CEO, depending on the approved structure.
- Direct CEO escalation is reserved for critical risks, authorised matters, or situations where the normal reporting line is implicated.
- Reporting relationships, departments, and team assignments must be maintained accurately in the AfriVate Portal.

4. WORK SCHEDULE & AVAILABILITY

4.1 Official Work Days

- **Monday to Thursday:** Primary execution, collaboration, meetings, and decision-making.
- **Friday to Sunday:** Off-days or asynchronous update days unless an approved team schedule states otherwise.

Teams supporting weekend operations may schedule work in advance with Team Lead approval and appropriate notice.

4.2 Work Hours & Meetings

- Each team will define core availability hours within official work days.
- Team members must be reachable through Slack during those hours.
- Meetings require punctuality, preparation, active participation, and advance notice where attendance is impossible.
- Repeated unauthorised unavailability, lateness, absence, or disengagement may affect performance evaluation.

5. OFFICIAL SYSTEMS & COMMUNICATION

5.1 Slack: Official Internal Communication

Slack is AfriVate's official channel for internal communication, coordination, clarification, follow-up, and operational escalation. Official Slack messages must be professional, clear, solution-oriented, and acknowledged within **four (4) hours** during official work days.

Personal messaging applications, including WhatsApp, must not replace Slack for official work. Slack supports day-to-day coordination only; the AfriVate Portal remains the system of record for submissions, approvals, acknowledgements, and operational history. Email is reserved for account access, approved external correspondence, and circumstances expressly authorised by leadership.

5.2 AfriVate Portal: Official System of Record

The AfriVate Portal is the official system for every feature and workflow available within the website. Where a Portal feature exists, the relevant work must be completed and recorded there. This includes:

- Tasks, assignees, priorities, deadlines, status, progress, hours, and blockers;
- Weekly check-ins, goals and OKRs, 1:1 records, development plans, feedback, and milestones;
- Leave requests, supporting documents, reviews, and decisions;
- Onboarding, learning assignments, certificate submissions, and completion records;
- Resources, policy acknowledgements, surveys, events, and approved company records;
- People operations, reporting relationships, grievances, recruitment, recognition, and other enabled workflows.

System rule: Slack is used to communicate; the Portal is used to perform and record the corresponding workflow. A Slack message does not replace a required Portal submission, approval, acknowledgement, or update.

6. STANDARD WORK PROCESS (HOW WORK IS DONE)

6.1 Task Assignment

All actionable work must be recorded in the Portal by the authorised owner or Team Lead. A valid task must contain:

- **Clear Owner:** One accountable owner or identified assignees.
- **Defined Outcome:** A clear description of successful completion.
- **Priority & Deadline:** The relative urgency and agreed delivery date.
- **Supporting Context:** Relevant files, dependencies, notes, and success criteria.

Clarification and coordination occur through Slack; the agreed outcome must then be reflected in the Portal task.

6.2 Execution & Reporting

- Execute work to agreed quality, security, and professional standards.
- Keep Portal tasks current by recording status, progress, hours, and blockers.
- Communicate risks, delays, and blockers early through Slack.
- Submit the weekly report through **Portal** → **Weekly check-in** against defined KPIs.
- Team Leads review performance and escalate where required.

7. TARGETS, KPIS & PERFORMANCE MANAGEMENT

7.1 Company and Individual Targets

AfriVate's primary strategic objective is **1,000,000 users by 31 December 2026**. Departmental and individual goals must directly or indirectly support this objective.

Each team member must maintain **3–5 weekly KPIs** that are specific, measurable, actionable, and results-driven. Goals are recorded in Portal OKRs and progress is reported through Weekly check-in.

7.2 Appraisal Structure

- **60% Deliverables & Output:** Quality, timeliness, consistency, and impact.
- **40% Professional Skills:** Communication, ownership, attitude, teamwork, reliability, and conduct.

Standard employees receive quarterly appraisals. Employees with active performance concerns may receive monthly reviews or a Performance Improvement Plan (PIP). Portal records—including tasks, check-ins, OKRs, feedback, 1:1s, and development plans—form part of the evidence used in a fair evaluation.

7.3 Performance Scale

- **70% and above:** Exceptional performance; reward-eligible.
- **60–69%:** Good performance.
- **50–59%:** Performance concern; coaching required.
- **40–49%:** Disciplinary or corrective action may apply.
- **Below 40%:** Termination consideration, subject to fair review and applicable policy.

8. LEAVE, ATTENDANCE & CONTINUITY

Leave must be requested through the AfriVate Portal in accordance with the current Leave and Absence Policy. Except for accepted medical or clearly specified personal emergencies, a minimum of **three (3) official work days' notice** is required.

Before leave, outstanding work must be completed or reassigned, Portal tasks and shared records must be updated, and the handover must be communicated through Slack. A request is not approved until the decision is recorded in the Portal. Repeated avoidable impromptu leave may attract corrective action.

9. DISCIPLINE & CORRECTIVE ACTION

Discipline exists to correct behaviour and protect organisational standards. Triggers may include missed deadlines, inaccurate reporting, poor communication, unauthorised absence, misconduct, repeated underperformance, security violations, or failure to use the approved systems.

1. Documented coaching or verbal warning
2. Written warning
3. Performance Improvement Plan (PIP)
4. Restricted responsibilities or other proportionate corrective action
5. Termination, subject to fair review and applicable requirements

10. REWARD & INCENTIVE SYSTEM

Subject to leadership approval, performance, affordability, and applicable terms, recognition may include bonuses, learning opportunities, public recognition, representation at approved events, speaking opportunities, awards, or long-term benefits. Recognition and awards available through the Portal should be recorded there.

11. CULTURE & EMPLOYEE ENGAGEMENT

- **Ownership:** Take responsibility for outcomes, not only effort.
- **Punctuality:** Respect commitments across meetings, deadlines, and responses.
- **Respect for Authority:** Follow reporting lines while retaining the right to raise concerns responsibly.
- **Speak Up:** Confidential workplace concerns may be submitted through **Portal** → **People** → **Growth** → **Speak up**.
- **Participation:** Complete assigned surveys, learning, onboarding, policy acknowledgements, feedback, and development workflows in the Portal.

12. CRISIS MANAGEMENT & ESCALATION

A crisis is an event posing immediate risk to operations, reputation, infrastructure, legal standing, safety, or user trust. The escalation flow is:

1. The Team Member communicates the issue immediately through Slack and records the relevant operational detail in the Portal where an applicable workflow exists.
2. The Team Lead assesses severity and escalates a critical issue within one hour.
3. Executive Leadership coordinates the response.
4. The CEO retains final authority over crisis decisions.

13. DOCUMENT GOVERNANCE & AMENDMENTS

This SWP is a living document reviewed every six months or when material operational changes occur. The current approved copy will be maintained under Portal Resources. Personnel are responsible for reading the current version and completing the required Portal policy acknowledgement.

14. EMPLOYEE ACKNOWLEDGEMENT

By completing the policy acknowledgement in the AfriVate Portal, the team member confirms that they have read, understood, and agree to comply with this SWP. Where a physical signature is required, complete the fields below.
